

HUEGO RANGER MAKING GOOD

Has Good Daily Production; Contracts Awarded for New Wells.

The Huego Ranger Oil company has an actual production of 450 barrels a day from its well No. 1 and 500 barrels from its No. 2, only 350 feet apart on a 40 acre lease, and will spend in the No. 3 on the same tract Saturday, according to C. L. Bell, secretary and treasurer of the company, just back from the Huego field. The third well should be brought in about October 15. Mr. Bell said the company has all necessary equipment for storage and for handling the output of the 40 acre tract as wells are brought in.

The company has a drilling contract to have a well put down on a 20 acre lease in Stephens county.

BIG SPRING PRODUCTION COMPANY SPUDS IN WELL

Big Spring, Texas, Sept. 12.—A third test well will be spudded in in Howard county by the Big Spring Production company, as soon as the rig arrives at the location. The well will be spudded in on the Green lease. The derrick is already up.

RESTORES VITALITY

Gives Strength to the Nervously Weak and Run-Down.

Pepton is both medicine and food for the blood and nerves. It is in full accord with advanced science as to the proper treatment of anemic and neurasthenic conditions, in which the need of more and better nourishment is so apparent. It combines iron and manganese with nut, celery, orange and other tonic and digestive. It supplies the deficiency of red blood corpuscles in anemia, repairs the waste of nerve tissue in neurasthenia, gives color and stamina, and restores vitality.

"I was run down and nervous. Pepton has done me great good." Serena Riffenberg, Tivoli, N. Y.

Made by C. L. Hood Co., Lowell, Mass.—Adv.

WELLS ARE ON TOP OF SAND

Many Completions Are Reported in the Burkburnett Fields.

Wichita Falls, Texas, Sept. 12.—The following wells have been completed or have reached the top of the sand in the Wichita Falls district:

West of the Burk-Wagoner and Texas Chief wells, the Texas company has completed its No. 4 Morgan. It is making 5000 barrels per day.

G. C. Wood's No. 3 Evans is showing for a good producer at a depth of 1630 feet. The drill is on top of the sand. This well is situated in the proven field to the west in block 22 of the Greenwood survey.

The Kirby Oil company's Taylor No. 1 in block 24 encountered an oil bearing sand at a depth of 1575 feet. The derrick is now rising up to test out this sand.

The Mc-Texas Oil company in block 218 is on top of the sand with a fine showing of oil. The well is closed down pending the construction of sufficient tanks. No estimate has been made of the production.

The Sver Pool Oil company No. 2, No. 1 Evans, making 2000 barrels of oil daily.

The Western Star Oil company's No. 1 Taylor, block 25, is standardizing. It is expected in any day.

The Burk-Dalton Oil company is swabbing 75 barrels of oil daily from its well on the Carl tract, block 41, Red River Valley lands, at a depth of 1590 feet.

The Mora Marie Oil company's test in block 72 is in. No estimate has yet been made of the production.

The Texas-Cal. Oil company is drilling at 2220 feet in its test on the Van Cleave tract, northeast of Burkburnett. It will be carried to a greater depth.

TULARESA CO. BUILDS DERRICK. It is announced that the Southwest-Tulare Basin Oil and Refining company, recently organized in El Paso, has commenced the building of its derrick northwest of Tulare, Owens county, N. M. It is also stated that the company has bought a standard rig.

ERECT DERRICKS IN NEW FIELDS

Oil Companies Showing Activity in Bexar and Surrounding Counties.

San Antonio, Tex., Sept. 12.—Bexar and the surrounding counties are enjoying a marked advancement in oil activities. Many new locations have been made and a large number of new derricks are under construction. Some companies have wells already in while others are hastening drilling operations.

The Helvetia Copper company's No. 1 Klempe was completed last week in Bexar county with a production of five barrels at a depth of 1800 feet. The well is on the pump. In this same county the Arrow Head Oil company brought in its No. 1 McCloskey at a depth of 1400 feet. The well is balling. Stephen McCloskey's No. 1 A is preparing to pump at a depth of 185 feet.

Interesting operations in this vicinity are: The McKoon Oil company No. 1 Henry Farm, 12 miles south of San Antonio, drilling at 200 feet; San Jose No. 1 Kerr, 14 miles south of San Antonio, shut down. Witherspoon's No. 2 Lagrange, drilling at 450 feet; Talschke No. 3 of the Blue Ridge oil company, drilling at 300 feet. The Talschke, shut down for cement casing to be set at 1000 feet. Pioneer Oil company's No. 1 James, drilling at 1500 feet and the Graburg Oil company's No. 12 Hartung, drilling at 1675 feet.

REPORT SHOWS TEXAS LEADS ALL STATES IN PRODUCTION

There were 210 wells completed in north central Texas during August, and the average production, including gas wells and dry holes, was 67 barrels. The average in Pennsylvania was a little over six barrels in Oklahoma 13 barrels. Oklahoma accounted for 750 of these completions, Kansas 250, Pennsylvania 150 and Tennessee and Kentucky for 150.

WELL PRODUCES 1500 BARRELS

Texas Company's J. C. Littleton No. 3 Makes a Big Showing.

Ranger, Tex., Sept. 12.—In its complete state the Texas company's J. C. Littleton No. 3 at a depth of 2345 feet is spraying 1500 barrels of oil. The six and five-eighths inch casing has been set to the 3275 foot level. West of Ranger this company has two wells which are showing for good producers and are expected in at any moment.

The Texas company's best producers in the Ranger district, are the Nos. 1 and 2 Lloyd, which are making a total production of 5223 barrels daily. On the Grice lease this company has two wells which together produce about 2000 barrels daily.

M. A. Hise No. 1 is drilling in the black line at a depth of 3160 feet and is making 220 barrels of oil daily. Well Makes 50 Barrels. The Hagaman No. 2 of the same company is making 50 barrels on the pump.

The Sinclair Oil company, while pulling the six and five-eighths inch casing from its Coody No. 1 in the South Caddo field, dropped a string 172 feet. With several joints of cramped pipe at the bottom, the hole is in a very bad condition. It will take some time to clean out the hole. The Vaughan No. 1, in the same district, is 24 feet in the black line at a depth of 2154 feet and is showing both oil and gas.

In the district north of Ranger this company has a good well promised in the Hagaman No. 2. The well is standing 2500 feet in oil and will be completed when the casing job is completed.

In the Pay Sand. The Magnolia Petroleum company's C. T. Terrell No. 3 in the Deadwood pool is in the pay sand. With the drill just on the sand the well made 20 barrels.

The Prairie Oil and Gas company's E. Raper No. 12 is making 700 barrels of oil from a sand encountered at 2300 feet and extending to 3254 feet. When first brought in this well made 100 barrels per day, but when drilled four feet further in the sand, the flow decreased 100 barrels.

The Sinclair, McGlothlin, southeast of Ranger, cleaned itself out with a heavy gas pressure when the bridge was drilled out. The well is showing both oil and gas and will be given a second shot soon. In the west field Tinsell No. 3 is pulling the ten inch casing at 2280 feet. The J. E. Barnes No. 4 is 10 feet in black line at a depth of 2345 feet. No showing of oil or gas has been encountered.

The Ana Man White test in Bosque county, four miles north of Clinton is in black shale at a depth of 1720 feet. The Sinclair Oil company has made a large number of new locations during the past week, most of these were made in the South Caddo district.

Company to Resume Its Drilling Soon

Benjamin, Tex., Sept. 12.—After being shut down since August 27, at 540 feet, the De Leon Petroleum company is setting 7 1/2 inch casing in its well near here in Knox county and expects to resume drilling soon. Difficulty in getting casing is the cause of the lengthy shut down.

Sand should be encountered at 1400 feet, geologists say. The well attained its 1400 feet depth in 10 days.

Nine thousand acres in one block is owned by the De Leon Petroleum company.

Property is changing hands here every day at high prices. The Home Oil and Refining company, which has leases adjoining the De Leon Petroleum company lease, will sink wells soon. The first deep test will be drilled west of Benjamin.

OIL MEN SHOW INTEREST IN THE ADMORE DISTRICT

Ardmore, Okla., Sept. 12.—Not far a number of weeks has any operation in this district created so much interest as the one at Admore. The Admore & Dabbs, situated in section 22-46-2w, a northeast offset to the discovery well to the Hewitt field. At a depth of 1700 feet the drill entered a broken formation and since reaching the level the sand made some oil. The hole stands now 1300 feet in oil. The outside casing is being pulled preparatory to drilling into the sand encountered at a depth of 1300 feet.

Saturday the oil flowed over the derrick for more than 100 feet. The well will not be drilled in until pulling of the casing is completed.

The Heddon Petroleum company's well at Graham, in section 21-12-2w, has drilled into the sand encountered at a depth of 2285 feet. At a depth of 2225 feet the well began flowing 60 barrels per day.

The Jolla-Nouston well, in section 12-36-2w, Pontotoc county, has recovered the lost joint of casing and is now underdraining at a depth of 1165 feet in a blue shale formation.

DEEP WELL COMPANY FINDS OIL AND GAS AT 1,000 FEET

Corral, Texas, Sept. 12.—The Deep Well Oil company's well near Corral is standing in 30 feet of oil sand with the ten inch casing set on the cap rock at a depth of 1000 feet. The company is balling and a noticeable showing of oil and gas has been found. The derrick must drill 700 feet of mud before an estimate of production can be made.

Two Fields Oil company, No. 1, in the Corsicana-Purdum field, is drilling at 560 feet. The No. 2 is drilling at 500 feet.

The Elford No. 1 has a cable rig set. Drilling with this started Monday at a depth of 1400 feet.

The Cor-Texas Oil company's test in the Corsicana field has its derrick completed. Drilling will start soon.
